

改性塑料专用硫酸钡功能母粒

1、应用

专门应用于各种高光 PP、阻燃塑料、ABS 等改性产品中。它既能保持产品力学性能和光泽度，又减少混料过程中所产生的粉尘。本产品对改性塑料加工方面具有改良作用，且价廉物美降低成本。

2、产品优势

- (1) 力学性能高，分散性好，无黑点。
- (2) 环保、混料没有粉尘，耐高温。
- (3) 产品经安全认证，无硫味，无毒无害。
- (4) 综合成本比传统粉体价格更低，性价比更高。
- (5) 白度高，相容性好，质量稳定。
- (6) 无腐蚀性，硬度低，不损伤螺杆和模头。
- (7) 增加产品表面亮度，具有超高的光泽度。
- (8) 提高生产效率，增加单位生产量。

3、推荐型号：

- ① P-80
- ② P-90
- ③ P-100

Plastic grade modified barium sulphate functional masterbatch

1、 Product characteristics

It's specially applied to various high gloss PP, flame retardant plastic, ABS, etc. products. It not only maintains product's mechanical property and gloss level, but also reduce dust during mixing materials. This masterbatch can improve quality of modified plastic, and also lower production cost.

2、 Product advantage

- (1) Excellent mechanical property, good dispersion, no black dot.
- (2) Environmental friendly, no dust in mixing process, temperature resistance
- (3) With safety certificate, no sulfur smell, non-toxic
- (4) Cost effective. With lower overall cost comparing the traditional filler.
- (5) High whiteness, good **compatibility**, stable quality.
- (6) No corrosion, low hardness, no damage to screw and other equipment parts.
- (7) Increase brightness of plastic product surface, brilliant glossy
- (8) Improve production efficiency.

3. Recommending grade:

- ① P-80
- ② P-90
- ③ P-100
