

EP环氧色浆 / EP epoxy paste

广泛应用于环氧地坪涂料、防腐涂层、拉挤复合材料、浇筑及浸渍材料、环氧电器及胶黏剂产品着色。

Are widely used in epoxy floor paint, anti-corrosion coatings, pultrusion composite materials, casting and impregnated products coloring materials, appliances and epoxy adhesives.

产品特性 / Product Features

含有及不含活性稀释剂色浆体系

containing and not containing active diluent paste system

不沉淀、不易产生浮色、指研色差小

not precipitation, not easy to produce color, refers to research color difference is small

优异的耐候性、耐化学品性及储存性

excellent weather resistance, resistance to chemical character and storage

颜色定制及专属颜色调配服务

color customization and exclusive color allocate service

应用领域 / Application field

● 环氧地坪涂料及工业涂料

epoxy floor coatings and industrial coatings

● 重防腐管道涂层

heavy-duty pipe coating

● 环氧拉挤及浇筑材料

pultrusion and epoxy pouring materials

● 环氧电子、中、高压绝缘电气部件

epoxy electronic, medium and high voltage electrical insulation parts

● 环氧AB胶、厌氧胶、结构及密封胶、以及其它特种胶

epoxy resin AB glue, anaerobic adhesive, structure and sealing rubber, and other special rubber
