

## PU聚氨酯色浆 / JF High concentrated water based pigment paste

广泛应用于聚氨酯模塑泡沫材料、弹性体、防水材料、皮革、鞋材、聚氨酯涂料及胶黏剂产品着色。

Widely used in polyurethane molded foam, elastomer, waterproof materials, leather, shoes material products, polyurethane coatings and adhesives.

### 产品特性 / Product Features

#### 适用于聚氨酯单、双组分材料

suitable for pu single and double component material

#### 聚醚及聚酯体系广泛的相容性

the compatibility of polyether and polyester system widely

#### 可调节粘度、适合人工及在线混合工艺

adjustable viscosity, suitable for manual and online mixing process

#### 优异的耐候性、色牢度、不影响材料反应及性能

excellent weather resistance, color fastness, does not affect the material response and performance

### 应用领域 / Application field

#### ● 聚氨酯软泡、硬泡及自结皮制品

polyurethane soft foam, hard foam, and since the crust product

#### ● 聚氨酯防水涂料、跑道、地毯、草坪

polyurethane waterproof coating, runway, carpet, lawn

#### ● 聚氨酯浇筑型弹性体、脚轮及滤清器制品

polyurethane elastomer casting type, castor and filter products

#### ● 聚氨酯健身部件、福利器具、家具扶手

polyurethane fitness components, welfare appliances, furniture armrest

#### ● 聚氨酯医用、防护手套及合成革

polyurethane medical, protective gloves and synthetic leather

#### ● 聚氨酯缓冲部件及管道密封圈

polyurethane buffer components and pipe sealing ring.

#### ● 聚醚及聚酯型鞋材等

polyether and polyester material, etc
