

PVC聚氯乙烯色浆 / PVC PVC paste

广泛应用于在建筑、工业及日用品、健身及防护制品、地板、人造革、PVC浸涂等材料着色。

Widely used in construction, industrial and daily necessities, health and protection products, floor, artificial leather, PVC dip coating materials such as shading.

产品特性 / Product Features

与PVC材料极佳的相溶性与溶解性

excellent intermiscibility with PVC material and solubility

不沉淀、极低的挥发性

not precipitation, low volatile

粒径平均分布峰值在25um以下，着色强度高

the average particle size distribution of peak under 25 um, high tinting strength

优异的耐候性、耐迁移性、不影响制品力学性能

excellent weather resistance, resistance transference, will not affect the mechanical properties of the products

应用领域 / Application field

● PVD涂覆织物、墙纸及压延膜

PVD coated fabric, wallpaper and rolling film

● PVD健身、体育用品及玩具球

PVD, fitness ball, sporting goods and toys

● PVC人造革、地板、天花板

PVC artificial leather, floor, ceiling

● PVC医用、防护手套及浸塑液

PVC medical, protective gloves and jinsu liquid
