

UPR不饱和树脂色浆 / UPR Unsaturated resin paste

广泛应用于风电、建筑格栅与防腐管槽、交通及机电部件、卫浴及游乐设备、电器柜体开关及人造石制品着色。

Widely used in wind power, construction grille and anticorrosion tube slot, transportation and mechanical and electrical parts, sanitary ware and amusement equipment, electrical switch cabinet put oneself in another's position and artificial stonework coloring.

产品特性 / Product Features

不含苯乙烯及活性组分的不饱和树脂体系

do not contain styrene and active component of unsaturated resin system

低粘度、低添加量

low viscosity, low amount

高着色力、极佳的耐候性

high tinting strength, excellent weatherability

不影响制品力学性能

does not affect the products mechanical properties

应用领域 / Application field

- 胶衣、FRP (纤维增强复合材料)
gel coats, FRP (fiber reinforced composite material)

- SMC、BMC、拉挤玻璃钢材料
SMC, BMC, pultrusion glass materials

- 人造大理石、纽扣及工艺制品
artificial marble, buttons and technology products

- 不饱和树脂板材、型材
unsaturated resin plate, profile

- RTM (树脂传递模塑), 真空导流产品等各种复合材料
RTM (resin transfer molding), vacuum diversion products such as all kinds of composite materials
