

白色母粒

1、应用

现已广泛用于牛奶膜、流延膜、包装膜、保护膜、吸管、注塑件、管材中，也可用于以 PE、PP、EVA、PS、ABS 等为基料的其它塑料产品中。它对吹塑加工方面具有改良作用，且价廉物美。此产品已通过“SGS”检测，各项指标完全符合欧盟标准。

2、产品优势

白度高，无晶点，分散好，遮盖力强，光泽度更高。

无腐蚀性，不伤螺杆和模头。

耐高温、不起水泡，不影响添加剂功能。

不析出、不影响热合效果，减少电晕强度，提高印刷质量。

耐候性好，保证产品质量。

产品经安全认证，无荧光增白剂，价格低，性能更优。

3、推荐型号

① W-830

② W-860

③ W-880

White Masterbatch

1、 Application Now it was widely used in milk films, cast films, packaging films, protective films, straw, injection molded parts, tubular products, as well as other plastic products based on PE, PPEVA, PS, ABS. It has an improved effect on the plastic blow molding with high quality and low price. This product passed the "SGS" test, and all the indicators fully meet the European Union standards.

2、 Product Advantages:

(1) High whiteness, no pits, excellent dispersity, good covering capacity, higher gloss.

(2) Weatherability, quality assurance

(3) Non-corrosiveness, low hardness, no damage for screw and other equipment part.

(4) High temperature resistance, no blistering. no influence to additive's function.

(5) No transudation, no influence to thermal bonding effect, reducing corona intensity, improving printing quality.

(6) Good weatherability make excellent finished product quality.

(7) Passed the safety test, no fluorescent brightener. Low price and better performance.

3、 RECOMMENDED MODELS

① W-830

② W-860

③ W-880
