EFFICIENT MUD SOIL FHDF-25

GENERAL INFORMATION

FHDF-25 is a kind of modified bentonite, easily dispersing in water and having high mud-making capacity.

APPLICATION

FHDF-25 can be used in blind drilling field with water.

PROPERTY

- High mud-making capacity
- Low solid content with high viscosity
- Low sand content
- High suspension property
- High unctuousity property
- Low filter cake thickness
- Low filter loss

LEVELS OF USE

Typical levels are between 2-3% FHDF-25 based on total system weight.

THE MAIN PRODUCT QUALITY INDEX

INDEX \ TYPE	FHD-130DK
COLOR/Form	yellow, finely powder
MOISTURE, %	≤12.0
FINENESS (-200mesh)	≥85
Φ600 value, Pa.s	≥30
Filter loss, ml	≤15.0

PACKAGE AND STORAGE RECOMMENDATIONS

Package: double packing, the inner kraft paper bag, outer polyethylene film bag.

Store in a cool, dry location

FHDF-25 has a shelf life of 12 months form date of manufacture.
