

## 特性

该系列浮型铝银浆粒径分布均匀，其生产过程对大颗粒和杂质进行了严格的控制，使其筛网通过率极高。它具有较一般浮型铝银浆更好的遮盖力，白亮度和闪烁特性，能为用户提供满意的金属效果。

## 典型应用

适用于溶剂系统。广泛应用于普通工业漆、船舶漆、防锈涂料等。

## Properties

This series of leafing aluminium paste has smooth particle size distribution and strict control over large particles and contamination. Better hiding power, color, and brilliance than regular leafing products enable it to provide customers with premium metallic effects.

## Typical Application

For solvent system. Widely applied in general industrial coatings, marine paint, anti-corrosion paint, etc.

型号 Grade	固体含量 Nonvolatile content % (±2)	溶剂类别 Solvent	湿法筛网 通过率 Screen analysis (≥%)	平均粒径 Average particle size (μm)	漂浮值 Leafing value (%)	水面覆盖力 Water covering capacity (cm <sup>2</sup> /g)	微粒形状 Particle shape	浮/非浮 Leafing Non-leafing
ZXF919	62	MS/SN	85 (325 mesh)	16 - 20	>70	17000 - 26000	C	浮 L
ZXF914	62	MS/SN	85 (325 mesh)	12 - 16	>70	17000 - 26000	C	浮 L

溶剂类型：MS - 矿物油，SN - 石脑油。  
包装方式：25公斤铁桶包装。

Solvent type: MS - Mineral Spirit, SN - Solvent  
Naphtha.  
Package: 25kg-iron drum.
